

Ed Hawkes, Consultant

Overview of Expertise

Ed is an evaluator at Clear Horizon with experience in both quantitative analysis and qualitative research. With a strong statistical background and passion for qualitative research, Ed has the insight to develop innovative methodologies for mixed-methods research and analysis. Ed's experience in dashboard reporting reflects his ability to synthesise and visualise data in an accessible form. Ed has recently completed a Masters of Development Studies, with a particular interest in evaluation methodologies and conflict.

Qualifications & Training

- 2018 Masters of Development Studies, University of Melbourne.
- 2015 Bachelor of Commerce (Actuarial Studies), University of Melbourne.
- 2012 University of Melbourne Extension Program.

Project Experience

Dashboard reporting

- Windana Drug and Alcohol Recovery: Developed two client-facing dashboards that analyse and present survey results and supports staff clinical practice in real-time. (2017-18).
- Preventing Violence Together 2030: Developed one dashboard monitoring the long-term goals of the partnerships and progress towards them (2018).
- Djirra: Developed two donor-facing dashboards that automate data collation and analysis of monitoring data in real-time (2018).
- Beacon Industry Live: Developed one dashboard for assessing outcomes of careers sessions for high-schools students for an audience of industry facilitators (2018).

Evaluation and analysis

- Rachael Diprose, PhD: Statistical analysis and sense-making of communal conflict dynamics research in Indonesia, Sri Lanka, and Nigeria. Statistical analysis in R required fitting and assessing different models for likelihood of communal conflict escalation (2017).
- Windana Drug and Alcohol Recovery: Analysis, synthesis, and reporting of client results, including innovating with reporting design & results visualisation (2018).
- Cohealth Family and Reproductive Rights Education Program: Analysis, synthesis, and reporting of monitoring and evaluation data. Included presenting statistical results to untrained audiences (2018).

Monitoring and Evaluation (M&E) Frameworks

- Windana Drug and Alcohol Recovery: Led the development of the M&E Plan, including co-designing two Theories of Change and downstream research on validated data collection tools (2018).
- Preventing Violence Together 2030: Supported the development of the M&E Framework including development of the Theory of Change and data collection tools (2018).
- Family Violence Prevention Legal Service: Supported the development of the M&E Plan including the development of data collection tools and automated reports.
- NSW Young Farmer Business Program: Supported the development of the M&E Plan.

Facilitation

- Cohealth FARREP: Facilitated an evaluation workshop including the interpretation of statistical results for a team of health workers with little evaluation background.
- Windana Drug and Alcohol Recovery: Facilitated Theory of Change workshops and design workshops for health workers in both withdrawal and community services programs.

Positions held

2017–2018	Monitoring and Evaluation Consultant, Navigating Outcomes.
2017	Research Assistant, University of Melbourne.
2016	Research Assistant, Negotiation.
2015	AIIESEC in Melbourne Local Committee Vice President.
